PERSONAL INFORMATION

Name **BOTTINI MASSIMO**
Address VIA MONTPELLIER 1, 00133 ROME ITALY
Telephone +39 06 72596390
E-mail massimo.bottini@uniroma2.it

Nationality | Italian

Date of Birth November 24th, 1974

Gender | Male

WORK EXPERIENCE

- Dates (from-to)
 - Name of the employer
 - Occupation or position held
 - Dates (from-to)
 - Name of the employer
 - Occupation or position held

FROM 01/2023 TO PRESENT

Graduate School of Biomedical Sciences, Sanford Burnham Prebys (La Jolla, USA)

Affiliate Faculty

FROM 09/2015 TO PRESENT

Department of Experimental Medicine, University of Rome Tor Vergata (Rome, Italy)

Associate Professor

FROM 05/2016 TO 12/2022

Sanford Children's Health Research Center, Sanford Burnham Prebys (La Jolla, USA)

Affiliate Associate Professor

FROM 11/2017 TO 10/2019

Center for Excellence in Nanoscience, Chinese Academy of Sciences, Beijing, China

Visiting Professor

FROM 01/2010 TO 08/2015

Department of Experimental Medicine, University of Rome Tor Vergata (Rome, Italy)

Assistant Professor

FROM 10/2012 TO 04/2016

Infectious and Inflammatory Diseases Research Center, Sanford Burnham Prebys (La Jolla, USA)

Adjunct Assistant Professor

FROM 09/2006 TO 12/2012

NanoTumor Center (Moores Cancer Center), University of California San Diego, La Jolla, CA, USA

Adjunct Investigator

EDUCATION AND TRAINING

- Dates (from - to) FROM 09/2007 TO 2012
- Name and type of organisation providing education and training Infectious and Inflammatory Diseases Research Center, Sanford Burnham Prebys (La Jolla, USA)
 - Principal subjects covered Nanomedicine, biochemistry, microscopy, spectroscopy
 - Title of qualification awarded **Staff scientist**

- Dates (from - to) FROM 01/2005 TO 12/2006
- Name and type of organisation providing education and training Infectious and Inflammatory Diseases Research Center, Sanford Burnham Prebys (La Jolla, USA)
 - Principal subjects covered Nanomedicine, microscopy, spectroscopy
 - Title of qualification awarded **Post-doctoral fellow**

- Dates (from - to) FROM 04/2006 TO 05/2006
- Name and type of organisation providing education and training National Institute for Research and Safety (INRS, Paris, France)
 - Principal subjects covered Nanotoxicology
 - Title of qualification awarded **Advanced training course on nanoparticles**

- Dates (from - to) FROM 01/2001 TO 12/2004
- Name and type of organisation providing education and training School of Electronic Engineering, University of Rome Tor Vergata (Rome, Italy)
 - Principal subjects covered Encapsulation of metallo-proteins into sol-gel derived matrices: properties and applications.
 - Title of qualification awarded **PhD, Sensors and Learning Systems**

- Dates (from - to) FROM 01/2001 TO 09/2002
- Name and type of organisation providing education and training Infectious and Inflammatory Diseases Research Center, Sanford Burnham Prebys (La Jolla, USA)
 - Principal subjects covered Generation of innovative nanocomposite materials of biological and medical relevance.
 - Title of qualification awarded **Visiting PhD student**

- Dates (from - to) FROM 09/1992 TO 07/2000
- Name and type of organisation providing education and training Infectious and Inflammatory Diseases Research Center, Sanford Burnham Prebys (La Jolla, USA)
 - Principal subjects covered Fabrication of a sensor for the detection of gamma globulins.
 - Title of qualification awarded **Master of Science, Electronic Engineering -Summa cum laude-**

PERSONAL SKILLS

NATIVE LANGUAGE

ITALIAN

OTHER LANGUAGES

ENGLISH

- Reading skills EXCELLENT
- Writing skills EXCELLENT
- Oral expression skills EXCELLENT

RESEARCH LINES

Development of novel stimuli-sensitive nanoparticles for diagnostic and therapeutic use
Prof. Bottini has been working on the synthesis and characterization of diagnostic therapeutic nanoparticles for more than 10 years. During this time, he has also pioneered novel biochemical studies that led to the validation of the paradigm that the corona of soluble proteins adsorbed onto the surface of synthetic nanoparticles entering the body modulates the nanoparticle

therapeutic, pharmacokinetic and biodegradation profiles. These studies have been funded by several agencies. In 2009, Prof. Bottini was a recipient of a grant from the Juvenile Diabetes Research Foundation (JDRF) to develop a nanosystem for the cure of diabetes. In 2011 and 2012, he was awarded with the John Vaughan Scholar of the Arthritis National Research Foundation (ANRF) to develop nanoparticles aimed at delivering drugs to arthritic joints and assess their local biochemical interactions. These projects have been developed in collaboration with international scientists, including Prof. Nunzio Bottini (UCSD) and Prof. Bengt Fadeel (Karolinska Institutet, Stockholm, Sweden). In 2017, Prof. Bottini was awarded with a fellowship from the *Chinese Academy of Sciences* President's International Fellowship Initiative to visit the laboratories of Prof. Xing-Jie Liang at the *Chinese Academy of Sciences*. During his visit he was involved in projects aimed at the development of novel nanoparticles for the controlled release of therapeutic cargoes in tumours and inflamed joints. Due to his extensive experience in the interactions of nanoparticles with soluble proteins, Prof. Bottini has been involved in the grant "Biomaterial risk management" (BIORIMA), funded by the European Commission in 2017, as a participant with a budget, to assess how the adsorption of proteins from the extracellular milieu affects the biological functions of nanoparticles of clinical interest. Finally, Prof. Bottini was awarded with grants from the University of Rome Tor Vergata in 2018 and 2022 to develop novel nanoparticles for the treatment of osteoarthritis and COVID-19, respectively.

This research line is in collaboration with:

- Prof. Nunzio Bottini (University of California San Diego, La Jolla, USA)
- Prof. Xing-Jie Liang (Chinese Academy of Science, Beijing, China)
- Prof. Yongming Chen (Sun Yat-sen University, Guangzhou, China)
- Prof. Xun Sun (Sichuan University, Chengdu, China)
- Prof. Bengt Fadeel (Karolinska Institutet, Stockholm, Sweden)

Assessment of the biological, biochemical, and biophysical properties of matrix vesicles

Since 2013, Prof. Bottini has been investigating the enzymes driving the biogenesis and biological functions of matrix vesicles by using novel spectroscopic and microscopic methods. Since 2016, Prof. Bottini has also been actively participating to studies aimed at clarifying the biochemical mechanisms driving the matrix vesicles' biological functions by using proteoliposomes and lipid monolayers as matrix vesicle biomimetics. To date, these studies have led to several discoveries. First, they led to the discovery that the insertion and catalytic activity of tissue non-specific alkaline phosphatase (TNAP) in matrix vesicle-biomimetics is strongly affected by the lipid microenvironment. Prof. Bottini was recently awarded with a fellowship from the Print USP/CAPES Programa de "Professor Visitante do Exterior" to visit research laboratories at the USP in 2022 for one month and work on a project aimed at assessing the biochemical mechanisms mediating the matrix vesicle biogenesis.

This research line is in collaboration with:

- Prof. José Luis Millán (SBP Medical Discovery Institute, La Jolla, USA)
- Prof. Rene Buchet (University of Lyon 1, Lyon, France)
- Prof. Pietro Ciancaglini (Universidade de São Paulo, Ribeirão Preto, Brazil)
- Prof. Sławomir Pikula (Nencki Institute of Experimental Biology, Warsaw, Poland)
- Prof. Sadik Esener (OHSU Knight Cancer Institute, Portland, USA)

SOCIAL AND ORGANIZATIONAL SKILLS

- He has been teaching nanomedicine and biochemistry topics at the University of Rome Tor Vergata for a total of 14 credits
- He has been teaching nanomedicine topics at foreign institutions for a total of 6 credits
- He has been Invited to deliver 10 seminars at national and international institutions
- He has attracted funds from national and international institutions
- He has been awarded by international institutions
- He has been participating to the activities of international journals as editor and reviewer
- He has authored 74 manuscripts on peer-reviewed international journals
- He has been Invited to deliver talks to 13 national and international conferences
- He has organized 7 international conferences

PARTICIPATION TO CONFERENCES AS ORGANIZER

• Date	2022
• Venue	Riberao Preto, Brazil
• Conference	4 th International Conference on Matrix Vesicles: From Biochemistry to Clinic
• Date	06/2018
• Venue	Rome, Italy
• Conference	1 st International Conference on Matrix Vesicles: From Biochemistry to Clinic
• Date	09/2017
• Venue	Basel, Switzerland
• Conference	CLINAM, satellite session on "Arthritis Nanomedicine"
• Date	09/2016
• Venue	Frascati, Italy
• Conference	Nanoscience and Nanotechnology 2016
• Date	06/2016
• Venue	Cancun, Mexico
• Conference	Energy Materials and Nanotechnology, 1 st EMN Meeting on Nanomedicine
• Date	06/2015
• Venue	Cancun, Mexico
• Conference	Energy Materials and Nanotechnology, satellite session on "Nanomedicine"
• Date	06/2014
• Venue	Cancun, Mexico
• Conference	Energy Materials and Nanotechnology, satellite session on "Nanomedicine"

PARTICIPATION TO CONFERENCES AS INVITED SPEAKER

• Date	09/2019
• Venue	Chengdu, China
• Conference	1 st Asian Young Investigator Symposium on Pharmaceutical Science and Technology
• Talk title	SPARC-mediated delivery of methotrexate by albumin-based nanomedicines for efficient treatment of rheumatoid arthritis
• Date	11/2017
• Venue	Shanghai, China
• Conference	15 th Chinese Biophysics Congress
• Talk title	Morphological characterization of matrix vesicles during biomineratization
• Date	10/2017
• Venue	Santos, Brazil
• Conference	52 nd Congress of the Brazilian Society of Biophysics
• Talk title	Nanomechanical properties of matrix vesicles
• Date	08/2017
• Venue	Beijing, China
• Conference	ChinaNANO 2017
• Talk title	Biochemical and nanomechanical properties of matrix vesicles: an AFM-based study

• Date	05/2017
• Venue	Basel, Switzerland
• Conference	CLINAM
• Talk title	Multifunctional nanoparticles for osteoarthritis therapy and diagnosis
• Date	09/2016
• Venue	Frascati, Italy
• Conference	Nanoscience and Nanotechnology 2016
• Talk title	Recent progresses in osteoarthritis nanomedicine
• Date	06/2016
• Venue	Aracaju, Brazil
• Conference	2 nd Regional Congress of the Brazilian Society of Biophysics
• Talk title	Atomic force microscopy: general principles and applications in osteoarthritis therapy and diagnosis
• Date	06/2016
• Venue	Natal, Brazil
• Conference	2 nd Latin American Symposium on the Molecular mechanisms of Skeletal Mineralization
• Talk title	Atomic force microscopy of mineralization-competent matrix vesicles: a focus on the role of PHOSPHO1
• Date	06/2016
• Venue	Cancun, Mexico
• Conference	Energy, Materials and Nanotechnology, 1 st EMN Meeting on Nanomedicine
• Talk title	Raman spectroscopy/microscopy for <i>in situ</i> monitoring of trafficking and degradation of PEG-modified single-walled carbon nanotubes
• Date	11/2015
• Venue	San Francisco, USA
• Conference	Annual Meeting of the American College of Rheumatology
• Talk title	Engineered nanoparticles for therapeutic delivery to chondrocytes
• Date	08/2015
• Venue	Beijing, China
• Conference	ChinaNANO 2015
• Talk title	Targeted Nano systems for arthritis therapy
• Date	06/2015
• Venue	Cancun, Mexico
• Conference	Energy, Materials and Nanotechnology, Workshop of Nanomedicine
• Talk title	Intra-articular carbon nanotubes in the treatment of osteoarthritis
• Date	06/2014
• Venue	Cancun, Mexico
• Conference	Energy, Materials and Nanotechnology, Workshop of Nanomedicine
• Talk title	PEG-modified carbon nanotubes in biology and medicine: past, present and future
