2. INFORMATION

Attendance is compulsory

- Lessons: at least 67% of each subject and 40% of each module
- Clinical Practices: 100%

Preparatory exams

- Biology and Genetics for Physiology
- Chemistry and Introductory Biochemistry for Biochemistry
- Histology and Embryology and Biology and Genetics for Immunology and Immunopathology

Year-to-year transition requirements

- To enrol to the second year: two exams of the first year (CP I and Scientific Writing and Research Communication are not valid)
- To enrol to the third year: all the exams of the first year
- To enrol to the fourth year: all the exams of the first two years and one exam of the third year
- To enrol to the fifth year: all the exams of the first three years except Systemic Pathology I
- To enrol to the sixth year: all the exams of the first three years and four exams of the fourth year, including Anatomic Pathology and Pharmacology

These blocks must be overcome within the end of the winter session (February) of the year of concern.

Non-italian citizens must present a B2 certificate of Italian language to enrol to the fourth year.

Practical examples:

- A student attending “Biology and Genetics” must have at least 67% of attendances of the whole subject and at least 40% of attendances for the single modules “Applied Biology” and “Medical Genetics” in order to take the exam
- A student entering the third year in the a.y. 2022/2023 must pass all the first year exams by the end of February, 2023

Students must have the required attendance percentage to enrol in the following year; should this not be the case, they will enrol as RIPETENTE

Should students have reached the minimum percentage of attendances but not the required number of exams, they must enrol as FUORI CORSO

Note that, among clinical practices (CP), only CP III and CP VI are counted in the 36 programmed exams. However, all but CP I and CP II have a grade.

3. EXAM SIGNATURES

Once exams are passed, they are officially registered by the Student Secretariat and it is possible to find them on Delphi. Therefore, the following pages are just intended for consulting purposes on behalf of the student and of the examining commission, to check whether possible preparatory exams have been taken.
