WELCOME ADDRESS – WE'RE BACK AS USUAL!

We are happy and honored to invite you to take part in the 3rd hybrid Workshop "Hot Parade in Thoracic Surgery" that will be held in Rome next October 25, 2024.

After the success of our first two meetings, we were motivated to replicate it with the aim of making the point on some of the most intriguing issues that involve directly or indirectly thoracic surgeons. As in last year edition, the event will be both in presence and in streaming and will have a "parterre de **célébrités**" to provide us the expert opinions and animate discussions.

We kept the logo created for us by one the finest contemporary Italian painter/designer, the maestro Ugo Nespolo, which has become a distinctive emblem of this event. The venue will be once again the fascinating Tor Vergata University Congress Center in Villa Mondragone, an impressive manor house located in the Castelli Romani area, where you can breathe both history and culture across the centuries.

We look forward to welcoming all of you and wish you a fruitful scientific update.
